

The Cosmos of the Soul

I recently had the pleasure of Michele Doucette's latest e-book, a short, inspiring "spiritual" biography that allows you to follow her as she talks about her own personal spiritual path, thereby gaining some insights from her experiences. This book is an *excellent* example of a person working through their own personal awakening process in the hopes that her journey may relate to yours and/or perhaps even serve to enhance and/or accelerate your own. She talks about some of the spiritual books that have changed her life, or I should say, they changed the way she thought about and approached her life. She even describes some of the key points from these powerful spiritual texts, giving you a glimpse of whether or not a specific spiritual resource may help you on your own path. In order for you to get a better idea of what her e-book is all about, here are a few of my favorite quotes

All beings, at some point, embark on a spiritual journey. Such is the natural progression of what it means to be human. When an individual begins seeking answers to questions such as ... Who am I? Why am I here? What is my purpose? ... h/she is resonating with soul knowingness, cognizant of the fact that the journey of liberation and destination has begun, for it is this very questioning that drives one towards awakening. Quite simply, you become a seeker of your own truth, the truth that already exists within.

Spirituality has nothing to do with what you believe and everything to do with your state of consciousness.

As you grow in our own personal awareness, the mass consciousness also begins to shift accordingly. Each and every one of us plays an integral part in creating our own reality. In essence, we can create the kind of world that we wish to experience. We have the ability to co-create with God. This means, then, that we take full responsibility for our own life experiences.

If these resonated with you, I strongly recommend you make some time for this short read (a mere 49 pages) that contains some very powerful quotes and deep spiritual insights.

On a completely personal note, this e-book *truly resonated* with me.

Whether you plan on reading the entire e-book or not, Michele discusses an interview with Jean-Claude Koven, author of *Going Deeper: How To Make Sense of Your Life When Life Makes No Sense* (beginning on page 27), highlighting some of the key points of that interview. Reading through these was *very enlightening* for me, causing several realizations to stir from within. I am so glad that Michele has made this e-book freely available.

I know that you will really enjoy reading *The Cosmos of the Soul*.
